PA Review-Flo-tronics

Jeff Rosenbloom

Paula Bisson

Paula-

I checked with Paul Blais about inspections of generators. He said that EPA is only concentrating on major violators, but he is interested in this case as the facility might be a non-notifier (storing hazardous materials for more than 90 days). This file should be referred to RCRA (see 2-way memo) and be placed in the PENDING category.

There is no evidence of hazardous waste disposal on-site. Therefore Superfund should consider the site no further action. Site should be referred to RCRA for their information. Paula Bisson 7-6-84

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY

DATE: August 23, 1984

SUBJECT: Flo-Tronic Metal manufacturing, Inc.
CAD042232892

FROM: Keith A. Takata, Chief
JK Superfund Program Branch, T-4 *Paula Bisson*
TO: Phil Bobel, Chief
Toxic & Waste Management Branch, T-2

The Superfund Branch has just completed a Preliminary Assessment of the Flo-Tronics site in Los Angeles, CA. The facility manufactures lighting fixtures and generates small quantities of hazardous waste as a result of metal cleaning and spray-painting.

Because there is no evidence of hazardous waste disposal on-site, Superfund will take no further action concerning this site. However, Paul Blais has indicated that RCRA may be interested in the facility as a non-notifier. The Superfund Branch contact for this site is Patti Cleary. Please inform Patti of any action you take concerning this site.
